

Customily

MAKE PERSONALIZATION SMART

ALLOW CUSTOMERS TO **PERSONALIZE** YOUR PRODUCTS RIGHT LIVE **IN YOUR STORE**

Customily's online product designer software gives customers the power to personalize any design on your eCommerce store. By working with design templates, customers can personalize products with parameters already defined by your designs, which means products will look great but most importantly will sell great.

Our online preview tools seamlessly integrate with your store to let customers design directly on your product page, in a fully responsive way both in mobile and desktop. By replacing your current product picture with our dynamic preview, customers can personalize by adding text, uploading pictures, and choosing different product variations on a simple way without having to go through tedious steps or annoying popups to complete the personalization.

Our web to print tools then provide you with high resolution files of your customers design ready for production, where it be printing, engraving or embroidery.

HOW DOES IT WORK?

INTEGRATION COMPLETE

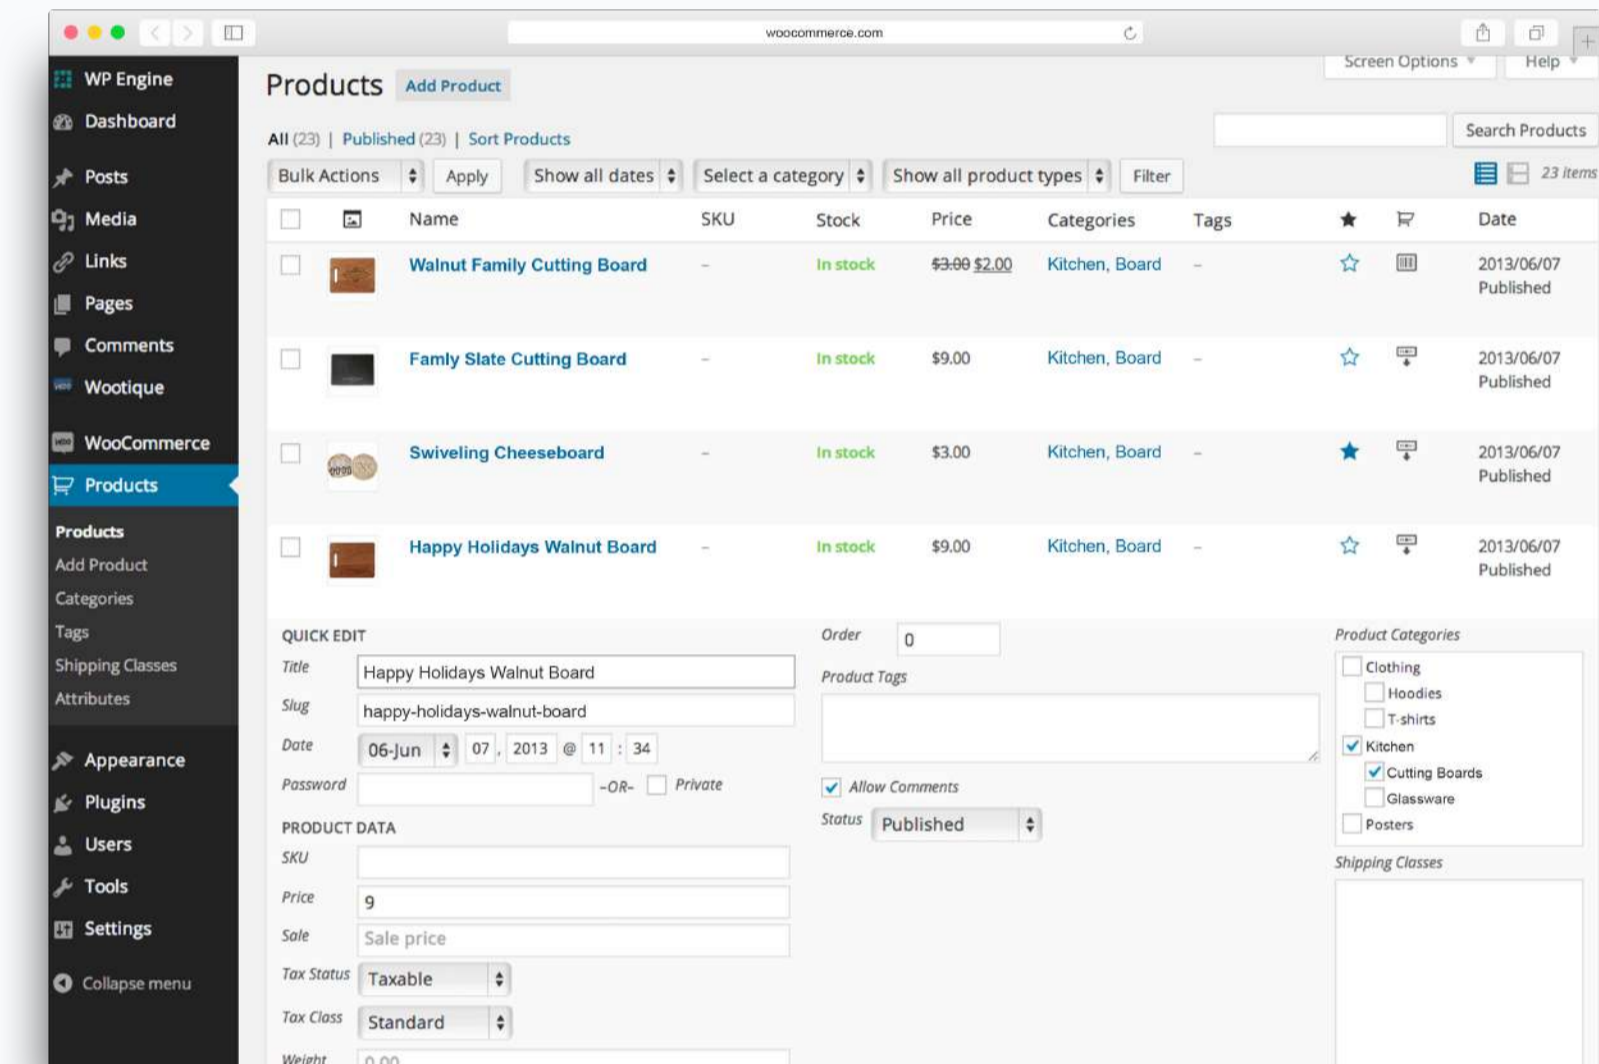

CUSTOMILY'S ADMIN

Customily's Admin allows you to transform your static products into customizable ones. Here you can set the personalization areas and parameters for your products, such as text, font variation, color variation, background and pattern variation, picture upload, etc. You can also define your output methods for printing, engraving and more.

YOUR STORE'S ADMIN

Once Customily is installed, our software links the products from your store with Customily's Admin to give them the dynamic behaviour. We work with Shopify, Magento, WoCommerce and more, even with custom built eCommerce solutions. We work with your current store setup, so you don't have to change anything from your current workflow.

ONLINE PRODUCT DESIGNER

Once you save the product settings, the dynamic personalization will automatically appear on your product page. Instead of your typical static product picture, customers will see a real dynamic preview of your product changing instantly while they design within your template. Customily's online product designer is fully responsive, producing high quality previews for web and mobile.

CUSTOMERS ORDER PLACED

READY TO MANUFACTURE

Your orders will appear as usual on your store's Admin Panel, only this time there will also be a link to download the ready to print file. There's no more need to manually process your orders before manufacturing, since Customily will provide your clients design ready for printing and, engraving in EPS, Ai, PDF, PNG or DXF files.

GET THE **RESULTS** YOUR STORE DESERVES

INCREASE SALES BY SHOWING CUSTOMERS WHAT THEY'LL GET

No more customer uncertainty and returns. Increase engagement with a fun 100% personal shopping experience.

REDUCE COSTS WITH SMOOTH WEB 2 PRINT

Goodbye to endless back and forth with customers, and designers working exclusively in translating orders.

DELIVER FASTER BY REMOVING MANUAL ORDER PROCESSING

No more extra hours on christmas, no more saturation during peak seasons. From order directly to manufacturing.
